Cairo on the Georgia-Florida border sent word that business' virtually had been demoralized by the gale and driving rains. Quitman was darkened at noon and a high wind already had done more damage to crops than did the storm last week: Barometers foll rapidly throughout the area, warning the residents to prepare for the gale. Communications to a section of the Florida coast reaching from above Cedar Keys to a point west of Apalachicola, was paralyzed. Little fear for that section was felt, however, since indirect reports from some of the coast towns said that small damage was done. At Panama City, port town 25 miles west of Apalachicola, storm warnings, had been taken down.

Torrential rains accompanied the advance of the storm, bringing flood threat to lowlands in Northern Florida and Southern Georgia, where highways were badly washed last; week and where repairs to liness of communications have been taken down.

Make-up Coarsen Skin?

That Depends on How You Remove It Now gentle palm and olive oils are

embodied in a special soap to bring out natural leveliness and safe-

THE real danger in make-up lies in the way you remove it. For unless it is removed each night carefully and thoroughly, pores will clog, skin will be blemished and sallow. Cleanse your skin with palm and olive oils in the rich lather of a beauty soap to keep its texture fine, its color glowing and youthful. Use Palmolive, a soap uniquely embodying these priceless beauty

oils. They penetrate and cleanse like nothing else will do. Every night give skin the fellowing care and forget about looking old: Gently massage Palmolive lather into the face for two minutes, using your own two hands. Allow the oily lather to penetrate and cleanse each pore. Then ringe with warm water, then cold: Dry by gently patting. A touch of cream if skin is naturally dry. That is all.
But don't expect Palmolive results unless you use Palmolive. 10c a cake. The Palmolive-Peet Company, Chicago, Ill.
